International Standard (IS)

A document, established by **consensus** and **approved** by IEC, that provides, for common and repeated use, rules, guidelines or characteristics for activities or their results, aimed at the achievement of the optimum degree of order in a given context

Technical Specification (TS)

Published when :

- Insufficient consensus for approval of an IS is available
- There is doubt that consensus has been achieved
- The subject is still under technical development
- Other reason precluding immediate publication of an IS

Publicly Available Specification (PAS)

- A publication responding to an urgent market need, representing either:
 - a consensus in an organization external to the IEC or,
 - a consensus of experts within a working group
 - Published after verification and checking that no conflict with existing IS by the committee concerned

Technical Report (TR)

➤ Informative document

Data of a different kind, e.g.

- Scientific supporting material
- Data collection
- Results of surveys
- State of the art
- Supplementary information or explanation
