AGENDA

- 1. Report**
- 2. Structures**
- 3. Model**
- 4. Planning**
- 5. Long term vision**
- 6. Question**

1. FEEDS report

First report published in 2004 (only web version)

Second report published in web and FISUEL Dropbox

Main sponsors : FISUEL, European Copper Institute

1. FEEDS report Why does it matter

In Europe 20 to 30% of all domestic fires have an electrical source (\neq origin)

If we do not step up with additional measures to improve the domestic safety soon, the issue might become even more urgent in the future

1. FEEDS report Why does it matter

Short term:

Renovation rate for EU dwellings is low

Medium term:

Europe's population is ageing rapidly

The generation of local electricity through PV panels become popular

Heat pumps, Electrical vehicles, ... (demand will increase)

Storage

1. FEEDS report Conclusions:

The fight against hazardous domestic electrical installations is far from being won in all EU countries.

Especially since the trends are towards an amplification of the phenomenon while the uses of domestic electricity continue to diversify and develop.

1. FEEDS report Conclusions:

In any case, the first positive results regarding the improvement of renovation rate or safety of old electrical installations appear in the countries where the statistical quantification of the phenomenon has been carried out.

In those countries, measures have been taken to generalise the condition assessment of the old electrical installations and to inform their owner about this condition.

1. FEEDS report Conclusions:

Per year	# population	# dwellings	BNP (%) of EU-28)	# residential fires		# electrical residential fires		% of fires from electrical origin	# fire accidents (all residential fires)	
				Fires reported	Total number of fires	Electric fires reported	Total number of electric fires		Fatalities	Injuries

1. FEEDS report Conclusions:

Per year	# population	# dwellings	BNP (% of EU-28)	# residential fires		# electrical residential fires		% of fires from electrical origin	# fire accidents (all residential fires)	
				Fires reported	Total number of fires	Electric fires reported	Total number of electric fires		Fatalities	Injuries

Assemblée Générale de la Fisuel – Abidjan / Côte d'Ivoire – 30 Avril 2018

Fisuel General Assembly – Abidjan / Ivory Coast – 30th of April 2018

1. FEEDS report Conclusions:

	Population	N of dwellings	Electrical fires
North EU	273 587 055	124 147 897	213 920
C. & E EU	105 970 262	40 636 222	23 006
South EU	133 205 368	62 297 305	44 727
EU total	512 762 685	227 081 424	281 653

1. FEEDS report Conclusions:

Where public policies in that direction have been the subject of a cost-benefit assessment, they have in any case proved positive, both for the parties concerned and for the community as a whole.

2. FEEDS structure

Members:

1. Fire Brigades: FEU + local, European Fire Safety Alliance
2. Insurances: Prevention Forum
3. Consumers: ANEC, International Union of Tenants
4. Institutions: Dutch Burn Foundation, ESF, Fisuel
5. Industry: Europacable, CECAPI, AIE, ECI

3. Model

Based on our knowledge, for a given country in EU, the following findings were made:

- Fires reported: intervention of Fire Brigade
- Total number of fires: 2.5 x fires reported according to Insurance Companies
- Fires from electrical source: 20 to 30% of total number of fires (25% retained into the methodology used)

4. Planning

Plenary meetings

Bruxelles	4/5/2018
Paris	5/3/2018
Barcelona	4/10/2018

WG 1 Statistics

Revison by FB (8/3/2018) Revison by Insurances
(12/04/2018)

WG2 Best practice questionnaire approved and will be send to the members of TC 64

5. Long term vision

1. FEEDS is recognised at the EU level as partner in the fire safety debate
2. Link with Energy Poverty
3. Develop Economic Model
4. Participation to the FIEP (Eu Fire Information Exchange Platform)
5. Fire safety weeks (prevention, detection, protection)

6. Question
