FISUEL General Information

World Safety Barometer website:

Following the transfer by CopperAlliance / ECI of the WSB website to Fisuel which was one of the subjects in the last Newsletter N° 43 of November 2021, New Caledonia is the first to have sent us the duly completed questionnaire (13 criteria) assessing the level of electrical safety related to electrical installations in residential buildings.

It completes the list of 41 previous reports. If you are not on the list of registered countries, consider doing so by going to the [WSB/barometer/contribute website](https://www.fisuel.org/WSB/barometer/contribute_website) to register and thus get the questionnaire back.

Like every year, ESF is taking advantage of the end of the year to solicit the generosity of the public and promote the support of our partners.

<https://www.fisuel.org/les-actualites/>

To carry out its projects, Electriciens sans frontières (ESF) relies on the contribution of many partners, especially those who wish to make international solidarity a strong focus of their social responsibility policy.

By promoting the safety of electricity users, solidarity is also at the heart of Fisuel's concerns.

At the end of the year, we invite you to support Electriciens sans frontières and thus allow more people to have access to electricity.

→ Fight against inequalities in access to electricity in the world with renewable energies, make a donate :

<https://electriciens-sans-frontieres.org/en/donate-2/>

Let us show solidarity where we know, more than ever, that access to electricity allows us to share **united** moments.

We recall that November 30 is the **World Day of Generosity** and December 20 the **International Day of Human Solidarity**.
