Standards

TC 82 – Solar photovoltaic energy systems

IEC TS 62257 series → Recommendations for renewable energy and hybrid systems for rural electrification

IEC TS 62257-9-8, Baseline requirements for the quality, durability and accuracy for stand-alone renewable energy products with the aim of protecting consumers.

IEC TS 62257-9-5, Integrated systems - Laboratory evaluation of stand-alone renewable energy products for rural electrification.

Recognized by the [World Bank](#) and the United Nations Industrial Development Organization ([UNIDO](#))

TC 8 - System aspects of electrical energy supply

Design and management of distributed energy resources (DERs), including microgrids

TC 57 - Power systems management and associated information exchange

IEC TR 61850-90-23, in collaboration with TC 8 / Subcommittee 8B. It complements the IEC 61850-7-420 Standard which addresses the [integration of DERs into the grid](#).

TC 117 – Solar thermal electric (STE) plants

IEC TS 62862 series → to cover a wide range of different types of systems in installed plants. Apply to very large electricity generating installations.

Key IEC standards for PV

Components

Modules

- IEC 61215
- IEC 61730
- IEC 62941 (QMS)
- IEC TS 63126
- IEC TS 63209

Inverters

- IEC 62109
- IEC 62093

PV array structure – Trackers

- IEC 62817

Direct

Design

- IEC 62548
- IEC TS 62738

- Civil
- Structural
- Electrical

Civil construction

Array construction

Processes

Installation

- IEC 63049

Inspection & Testing

- IEC 62446-1

Performance assessment

- IEC 61724-1/2/3

Operation & maintenance

- IEC 63049

Location factors

Sand – Abrasion

- IEC 62788-7-3

Salt

- IEC 61701

Ammonia

- IEC 62716

Conformity Assessment

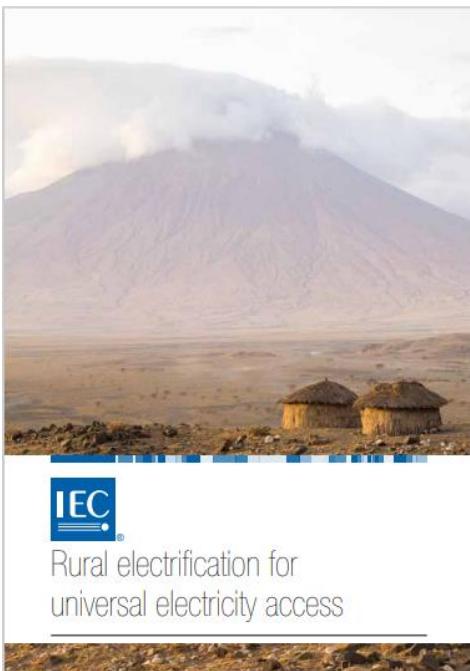

IECEE runs a program which offers access to qualified testing laboratories for the certification of PV components and modules in accordance with the relevant IEC Standards

Fundamental pillar of the IECRE is to enable sustainable electricity generation and supply. It is the internationally accepted CA system for all power plants producing, storing or converting energy from **solar PV**, wind and various forms of marine energy

IEC
Rural electrification for universal electricity access

This image shows a landscape with small, traditional thatched-roof houses in the foreground and a large, active volcano emitting smoke and ash in the background. The IEC logo is at the top left, and the title is at the bottom left.

IEC
Electricity access
More than a promise: LVDC

This image shows two workers in hard hats installing solar panels on a metal roof. A large circular graphic with "LVDC" is overlaid on the bottom right. The IEC logo is at the top left.
